

Predicting Customers

Luke Sims

Data Consultant

4 - 21 - 23

San Francisco, CA

Executive Summary

- 01** Use Pipeline to track prospects and advertise to convert
- 02** Reduce Bouncing/Exit rates with Sales Funnel approaches
- 03** Offer incentives and promos to repeats who visit the website
- 04** Weekends position product and Weekday Launches and Specials

Sellio's Business Problem:

Revenue.

**What's our prospective
customer's buying
process?**

**How do we maximize
opportunities for
conversion?**

**How can increase repeat
customers and market
better to new ones?**

Recommendations

Use this Pipeline with Cookies

Track prospects and convert them into happy customers

i.e: 70% of Signals, Call to Action

i.e: Returning customers/prospects marketing

Maximize Time / Reduce Exits

Stop people from changing pages with Sales Funnels loaded with engaging information

Timing Matters

Market Promotions/Product Launches should take place before holidays and incentives optimized for the weekends

51% of all sales happen during May and November
